SonoScape

The X Series Vet platform is a laptop color Doppler ultrasound system designed with high quality images out in the field. X Series Vet is equipped with SonoScape's superior imaging technology, providing professional veterinary software catering to a wide variety of animals ranging from small companion animals to large farm animals. Its crystal clear imaging and smooth workflow creates a new and improved examination experience that provides the accuracy you need for a confident diagnosis.

Professional Veterinary

With advanced features typically available on high end systems, the X Series Vet can cover all of your diagnostic imaging needs in one system.

- Dedicated fully configured veterinary software package

- Linear, convex, micro-convex and specialty transducers, with frequencies from 1-16 MHz

- User-definable graphic exam modes for companion animals, farm animals, lab animals and equines

- Variety of accessories including keyboard cover, standoff, biopsy guides and trolley

Efficient Experience

Since X Series Vet adopts SonoScape's latest imaging technologies to produce excellent images with high resolution and deep penetration, presenting a large amount of information onto the ultrasound screen. Improved image quality will allow for faster and more accurate exams of any species.

- Multi-beam processing technology
- C-field beam technology
- Spatial compound imaging
- μ-Scan image processing technology
- Pure inversion harmonic imaging

COMPANION ANIMALS

The companion animal package provides users with complete solutions for a variety of applications and animals. From the high definition screen and control panel design to the boot up speed and preset examination options, the X Series Vet accessories the examination process.

15.6 inch high definition LED monitor with a large display region

Noiseless system to prevent startling the animals

Boot up quickly with predetermined exam settings loaded and ready

Auto brightness adjustment screen and backlit control panel

Keyboard cover to avoid fluids and dust
EQUINE

Combining efficiency, simplicity and versatility, the X Series Vet is a great choice for equine examinations. Equipped with specialty transducers and equine specific software, it easily produces stunning images across necessary applications for equines such as MSK, reproductive organs, and has the penetration needed for abdominal and cardiac scanning as well.

- Advanced imaging technologies for high quality images to satisfy various practices, academia, research, and wildlife

- Satisfying equine presets for cardiac, abdominal, tendon, and reproductive evaluation

- Dedicated measurement, calculation, and annotation for each exam mode

- 180° Wide range folding angle and viewing angle

- Anti-reflective screen and a backlit keyboard

- Splash resistant and dust proof keyboard protective covering
