TE Air

Wireless Handheld Ultrasound System

Innovation Untethered

TE Air, the new generation wireless handheld ultrasound system from Mindray, is designed to adapt to various clinical scenarios. Mindray continuously innovates to offer more connectivity possibilities for the TE Air. In addition to its ability to connect with consumer-grade phones or tablets, the TE Air is compatible with the robust AirSight medical-grade main unit, making it ideal for unpredictable environments. The Air Realm AR glasses allow you to free your hands and focus more on the patients, ensuring smooth operation and providing an optimal imaging experience.

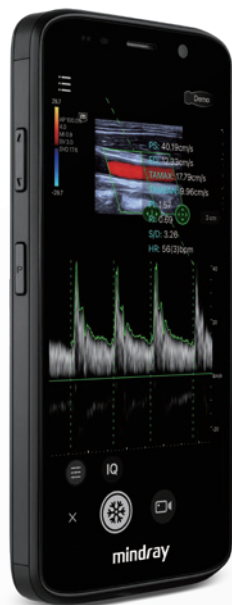

TE Air

Wireless Handheld Ultrasound System

Innovation Untethered

AirSight: A medical-grade handheld ultrasound system

Designed for medical environments

Waterproof and dust-proof
IP68 sealing for complicated environments

Drop tested
Pass 1m drop test

Disinfection capacity
Made by high-quality materials, and compatible with cleaner and disinfectants

Electromagnetic compatibility
Meet medical-grade electromagnetic compatibility standards

Tailored for you

- Dedicated medical device with streamlined safety operations
- App preinstalled, no need to worry about downloading
- Fast and stable connection with TE Air probe
- Work with Air Realm AR glasses
- Programmable button enhances the efficiency

Air Realm: innovated AR glasses, works with AirSight

- Enjoy high-definition details without affecting the observation of real operations
- Supports gaze-triggered gain adjustment, depth adjustment, and other functions for easy control
- Built-in myopia correction from 0.00D to -6.00D, different eye prescriptions can enjoy a clear AR experience
- 75g light weight
